Under the guidance of:

Ms. Sakshi Goel
Assistant Professor
Department of IT

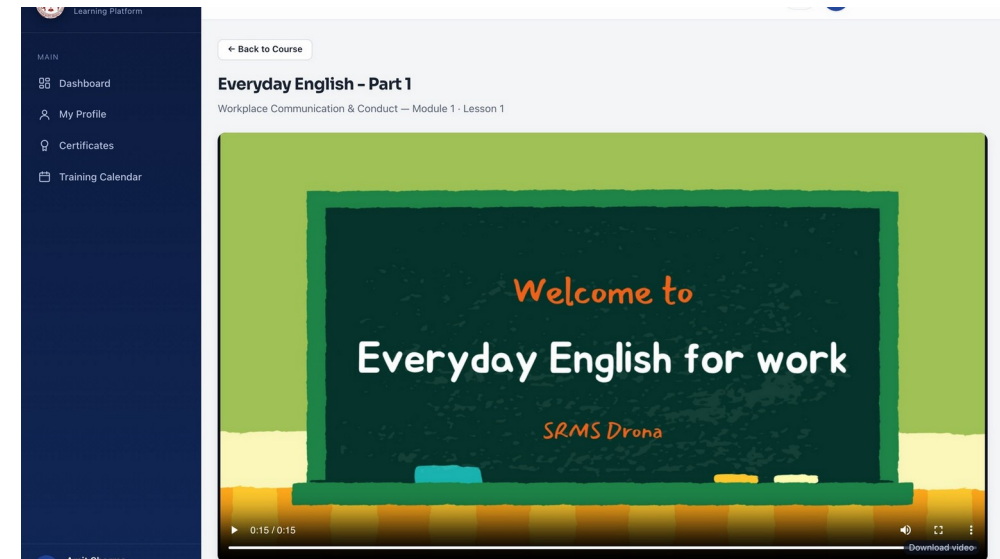

Problem & Real-World Need

- Staff training resources need a simple, centralized digital platform.
- Institutional learning material should be easy to access on mobile devices.
- Courses and quizzes need a structured digital delivery mechanism.
- Learning progress and achievements need proper completion.
- Administrators need tools to manage content and monitor participation.

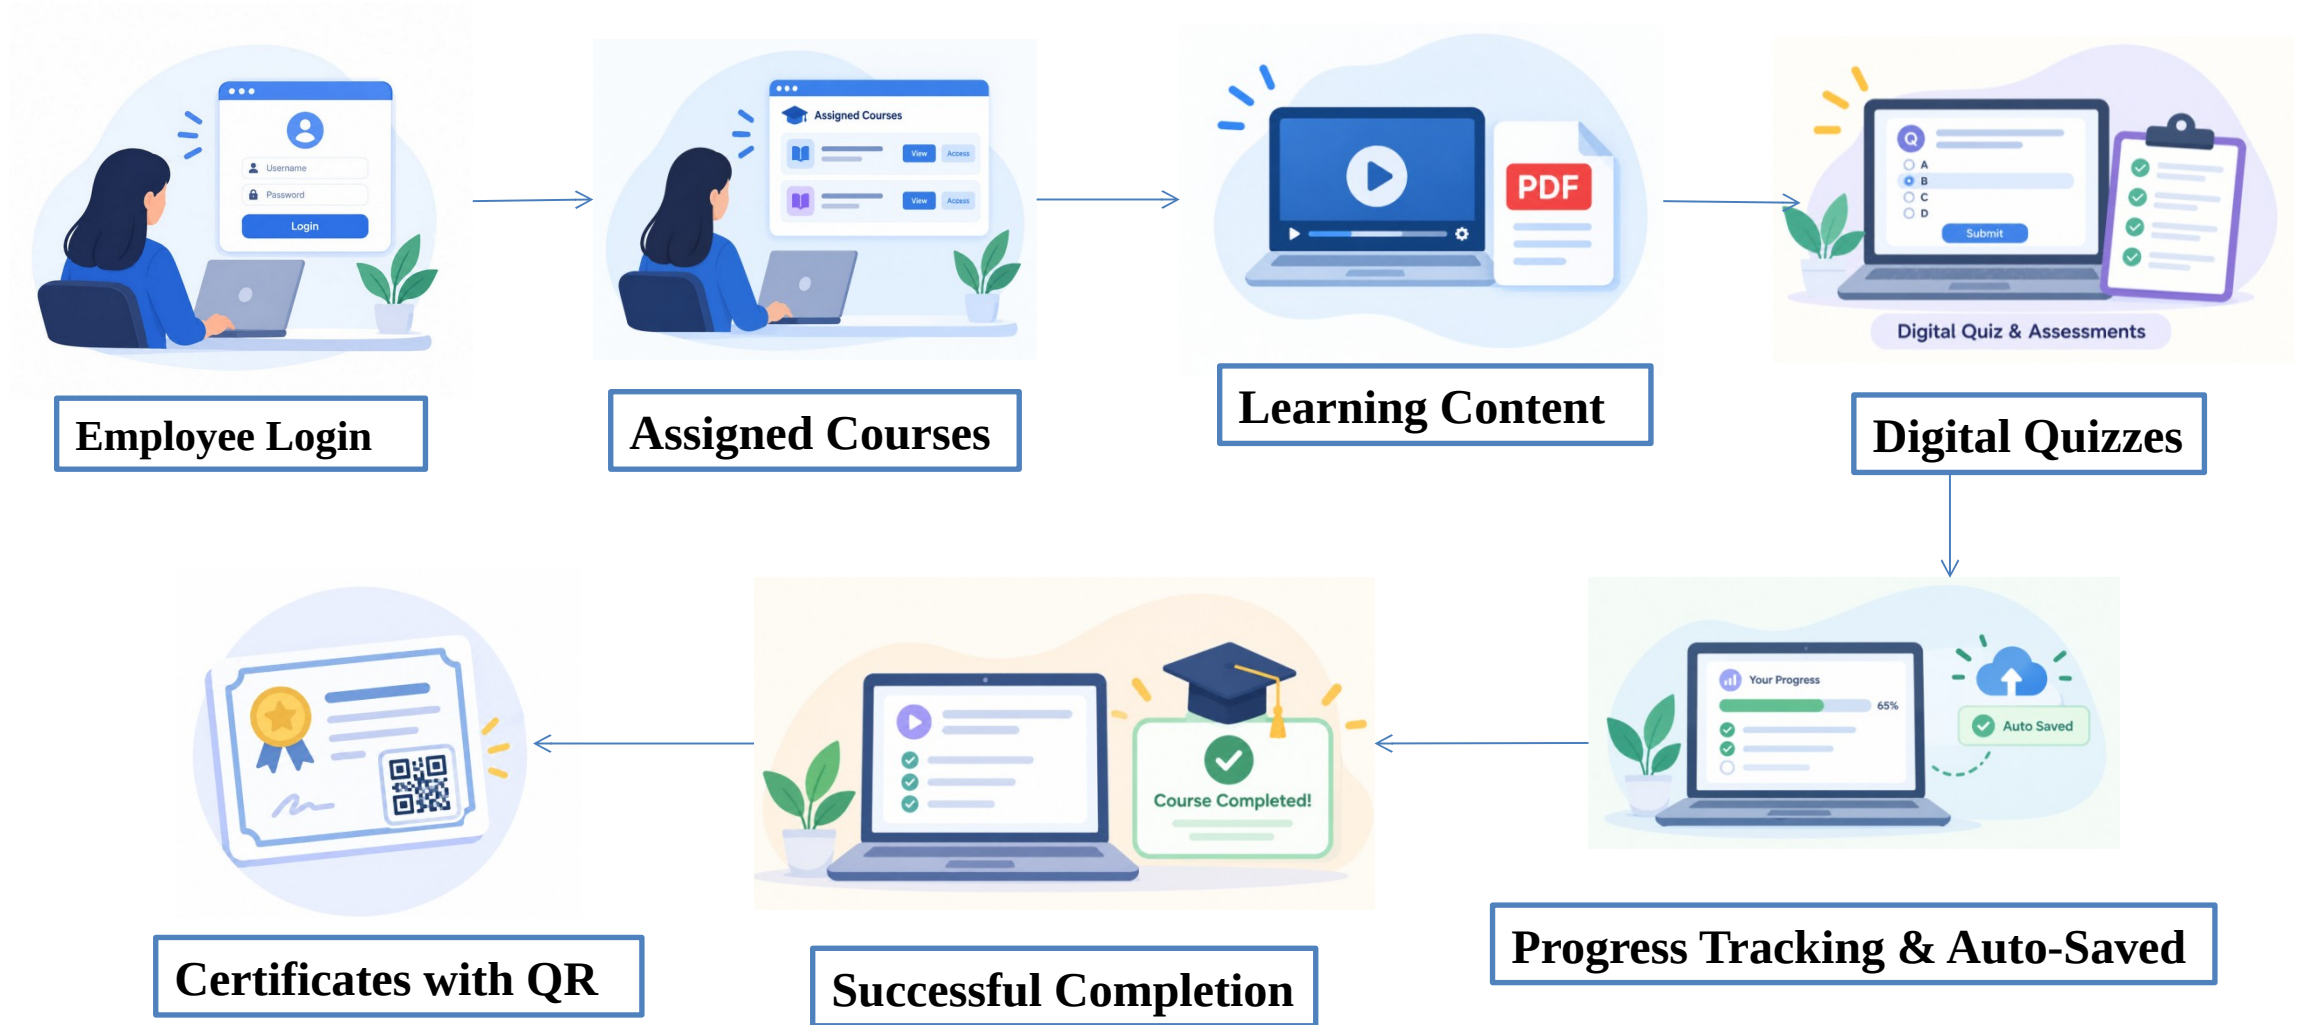

Our Proposed Solution

- **Staff Learning:** Digital access to institutional learning resources.
- **Course Management:** Structured courses & learning modules.
- **Quiz Management:** Digital quizzes & assessments.
- **Progress Tracking:** Track learning progress & achievements.
- **Certificate Generation:** Certificates after successful completion.
- **Notifications:** Keep staff informed about their performance.
- **Role-Based Administration:** Controlled management for administrators.

How Our Solution Works

Key Innovations & USP

SRMS Specific

Mobile First

User Experience:
Simple and intuitive.

Hindi + English

Language Support:
Hindi + English

Role-Based Access

Access Control: Role based administration.

All-in-One Platform

Institution Specific: Focused on internal organizational training

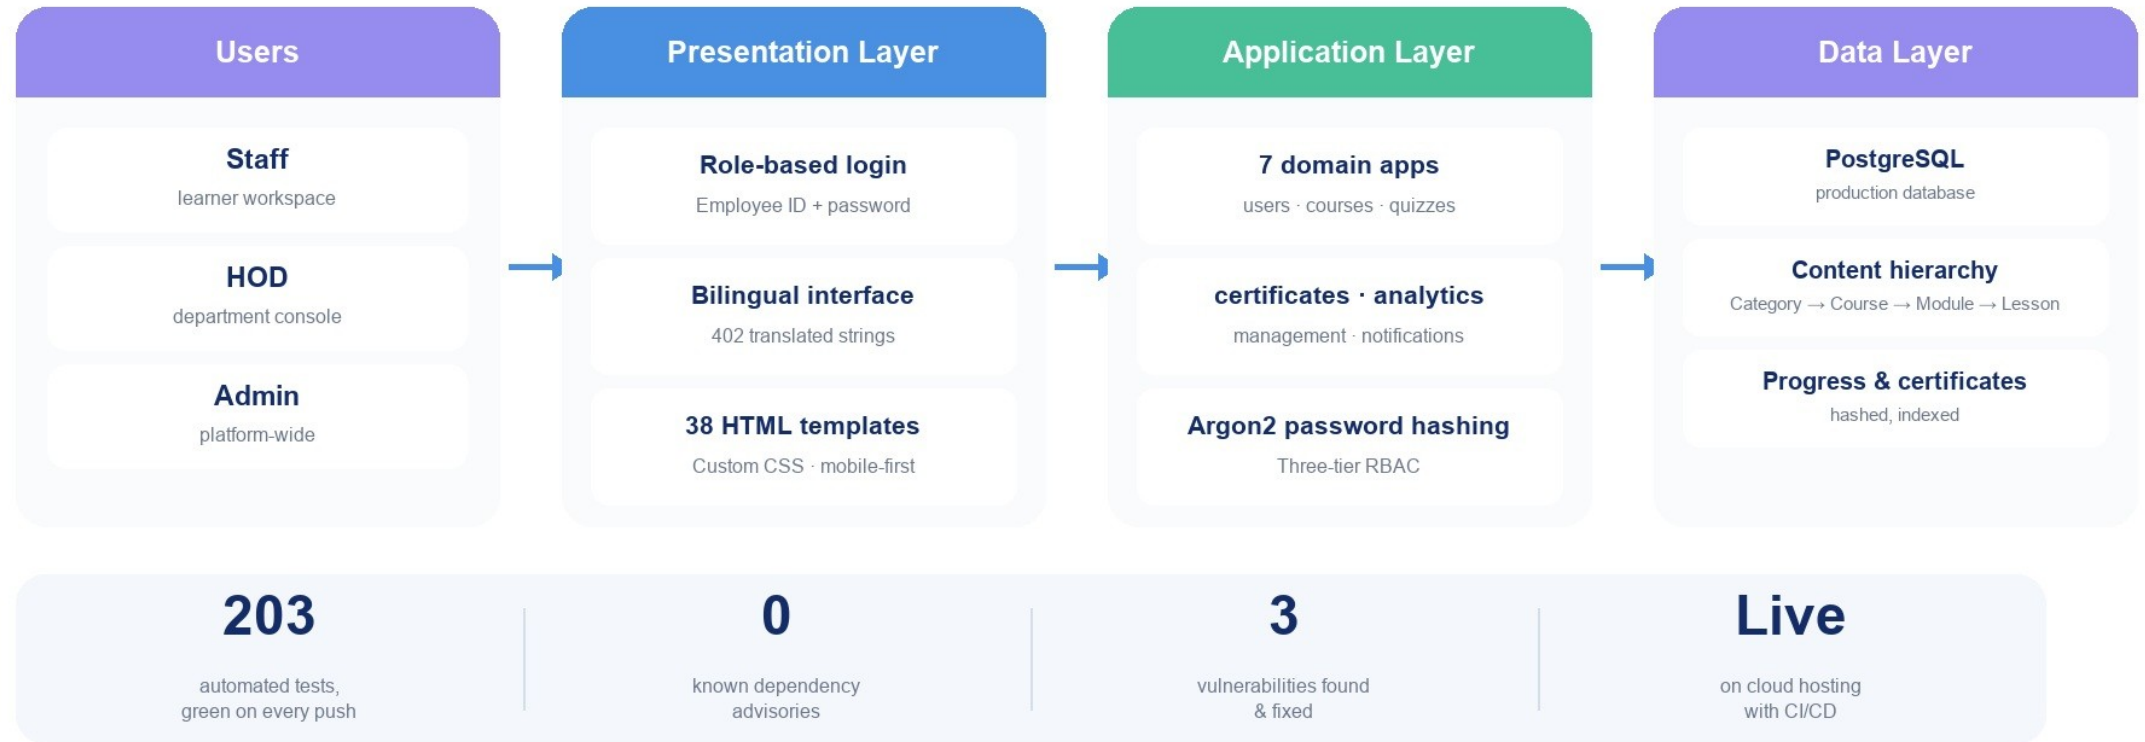

Certificates

All-in-One Platform: Learning + Quizzes + Certificates with QR + Notifications

System Architecture

Django 6.0.8 · PostgreSQL · deployed on cloud hosting

Progress derived server-side · HTTP Range video streaming · QR certificates with surname masking

AI-Assisted Assessment Generation

SOP Document

Gemini Model

Generated MCQs

INPUT:

- Uploaded SOP PDF,
- or pasted SOP text
- from the institute

MODEL:

Google Gemini writes questions, answer keys and explanations.

OUTPUT:

Generated administrator reviews and edits.

Feasibility, Impact & Deployment

Feasibility:

- Established, well-documented
- technologies (Django,
- PostgreSQL).
Modular design.

Impact:

- Digital Staff Training.
- Easy Resource Access.
- Progress & Achievement Tracking.
- Digital Certificates.

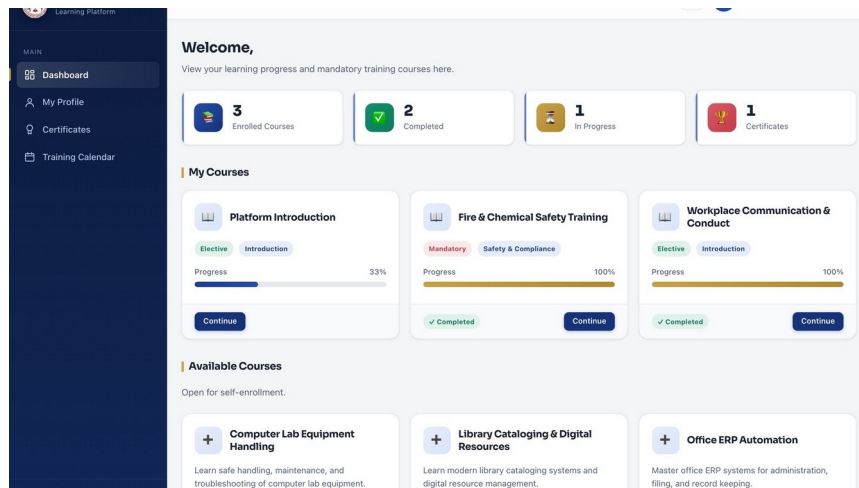

Deployed & Verified:

- Live on cloud hosting
- with CI/CD on every push
- 203 automated tests
- 0 known advisories
- 3 vulnerabilities found & fixed

Why Our Solution?

Generic LMS:

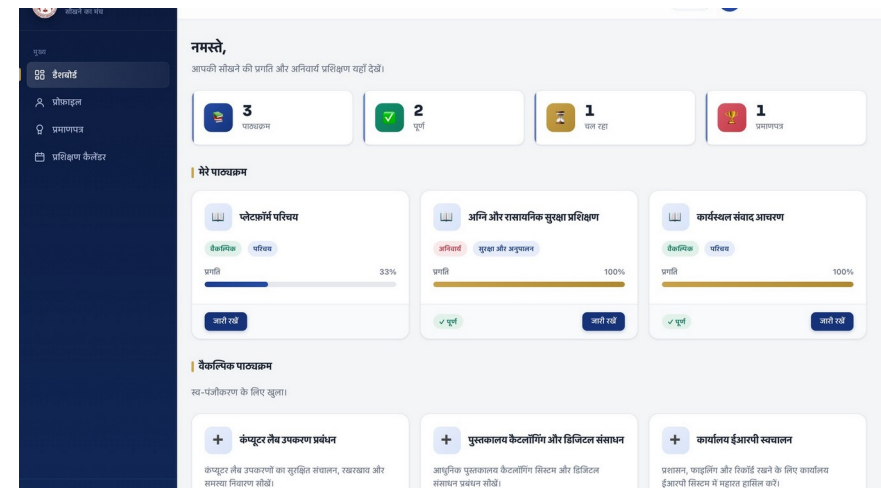

- General audience.
- Standard experience.
- Usually single language.
- Separate tools.
- Generic administration.

Same interface — English

SRMS Drona:

- SRMS specific.
- Mobile first.
- Hindi + English language.
- All in one tools.
- Role based administration.

Same interface — हिन्दी

*Thank
you!*
